

# Fast Functions!

Fill out the contract for each function, then try to write two examples and the definition by yourself.

# double :: Number → Number  
name domain range

examples:

double ( 5 ) is 2 \* 5

double ( 7 ) is 2 \* 7

end

fun double ( n ) :

2 \* n

end

# triple :: Number -> Number  
name domain range

examples:

triple ( 9 ) is 9 \* 3

triple ( 40 ) is 40 \* 3

end

fun triple ( n ) :

n \* 3

end
