

Word Problem: safe-left?

Directions: Use the Design Recipe to write a function 'safe-left?', which takes in an x-coordinate and checks to see if it is greater than -50

Contract and Purpose Statement □

Every contract has three parts...

f <hr/>	$:$ <hr/>	\rightarrow <hr/>
function name	domain	range
f <hr/> what does the function do?		

Examples □

Write some examples, then circle and label what changes...

(EXAMPLE ()
function name	input (s) what the function produces
(EXAMPLE ()
function name	input (s) what the function produces

Definition □

Write the definition, given variable names to all your input values...

```
(define ( function name variables )  
  what the function does with those variables )
```
