# Identifying Animation Data Worksheet: Sunset

Draw a sketch for three distinct moments of the animation

| Sketch A | Sketch B | Sketch C |

What things are changing?

Thing	Describe how it changes
Sun's x-coordinate	Location increases – moves to the right
Sun's y-coordinate	Location decreases – moves downward

What fields do you need to represent the things that change?

Field name (dangerX, score, playerIMG...)	Datatype (Number, String, Image, Boolean...)
xpos	Number
ypos	Number
